

# Events in Yekaterinburg that each of us would like to attend

Created by [Golovkina E.S.](#), [Gredinaru A.A.](#), students of MI-2131

# Underwater world (oceanarium)

More than 70 aquariums and aviaries, 3,000 marine and freshwater inhabitants. A unique underwater museum with marine and freshwater inhabitants. White-feathered sharks, nurse sharks, himantura stingray, butterfly fish, zebra wings, fox fish, surgeon fish, piranhas, electric eel, moray eels and many others! More than 200 species of underwater inhabitants and mammals. I think this is an amazing place that everyone who is interested in the underwater world will want to visit.

# “Dungeons of Yekaterinburg”

This is a tour, which I can be visited from 9 may. I will walk underground from the circus to the 18th century bridge, which has turned into a stalactite grotto.

I want to attend these events because I want to visit such a mystical atmosphere and enjoy the silence of this place.

# Dyatlov Pass

Quest performance "Dyatlov Pass" in Yekaterinburg invites you to explore one of the most important secrets of the XX century. Together with my friends, I could go on an unusual adventure to try to restore the picture and unravel the cause of the mysterious, mystical and still unsolved death of Soviet skiers.

# “The Dolphin Universe”

I can attend these events at the aquarium from May 9.

I've never seen dolphins not in a video. I am interested to see incendiary dances, amazing tricks, interactive games with the audience performed by dolphins, belugas and fur seals.

# The Magic Express train

Throughout the trip, adults and children will have a rich entertainment program: Wizards, magic, magic tricks, scientific experiments, unusual bubbles, potions, games, activities, predictions and so on. All passengers are waiting for gifts, as well as surprises and treats.

# “The Da Vinci Code”

This atmospheric quest can be visited today. According to the scenario, the team of participants plays the role of journalists who are looking for information about the abduction of a scientist.

I am interested in this quest because I love mysterious riddles and intricate stories.
