

My favorite actor

Childhood and youth

Noel Roy Fisher (this is the actor's full name) was born in Vancouver– the largest city in the Canadian province of British Columbia. It happened on March 13, 1984. The creative abilities of the guy showed up in his school years. At the age of eight, Fischer went to music school to learn to play his favorite song "Please, Mr. Postman" on the piano. This is the hit of the Marvelettes, which became famous thanks to the performance of the Liverpool four. Although Noel showed talent and ability to learn, the guy could not overcome his natural shyness for a long time. This was the reason that during his first performances at the concerts of the music school, Fischer sat with his back to the audience. Later, he managed to get rid of this fear.

Films

The most famous projects in which Noel Fisher took part are "Twilight", "Shameless", "Alien Invasion: The Battle for Los Angeles", "Hatfields and McCoys" and "Teenage Mutant Ninja Turtles"

Personal life

For a long time there were rumors about the actor's unconventional orientation. Fischer refused to comment on them, but eventually gave up. Noel gave an interview in which he stated that if his on-screen character in Shameless behaves like a gay man, it does not mean at all that the actor himself is from among sexual minorities.

On July 15, 2017, almost immediately after the above statement, Fischer married Leila Alizadeh, an actress of Afghan origin. The couple said that they started dating back in 2005, but did not want their personal life, as well as certain moments of their biography, to become public.

Noel and Leila have no children of their own, but since 2007 they have been taking care of a girl from Zambia.

A young boy with curly brown hair is shown in a close-up shot. He is wearing a black leather jacket and a black choker necklace. He is looking down at a green plush toy that is shaped like a creature with orange appendages. The background is slightly blurred, showing what appears to be a kitchen or a similar indoor setting.
