

ALBERT EINSTEIN

Huseynova Elmira 8V

This is a German physicist who is considered one of the greatest thinkers in the history of mankind.

Einstein was born in Ulm on March 14, 1879, to Jewish parents. He was a shy child.

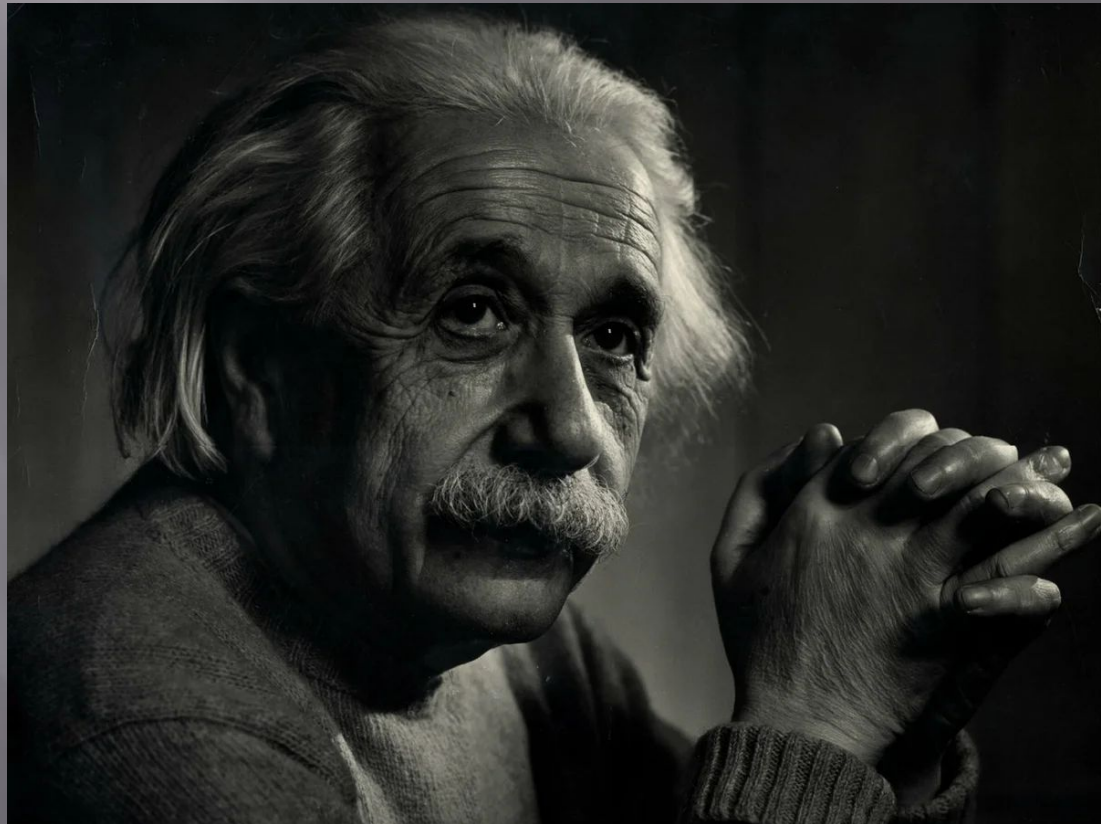

He attended a Munich elementary school where he showed an interest in science and mathematics but did poorly in other areas of study.

He finished high school and Technical College in Switzerland

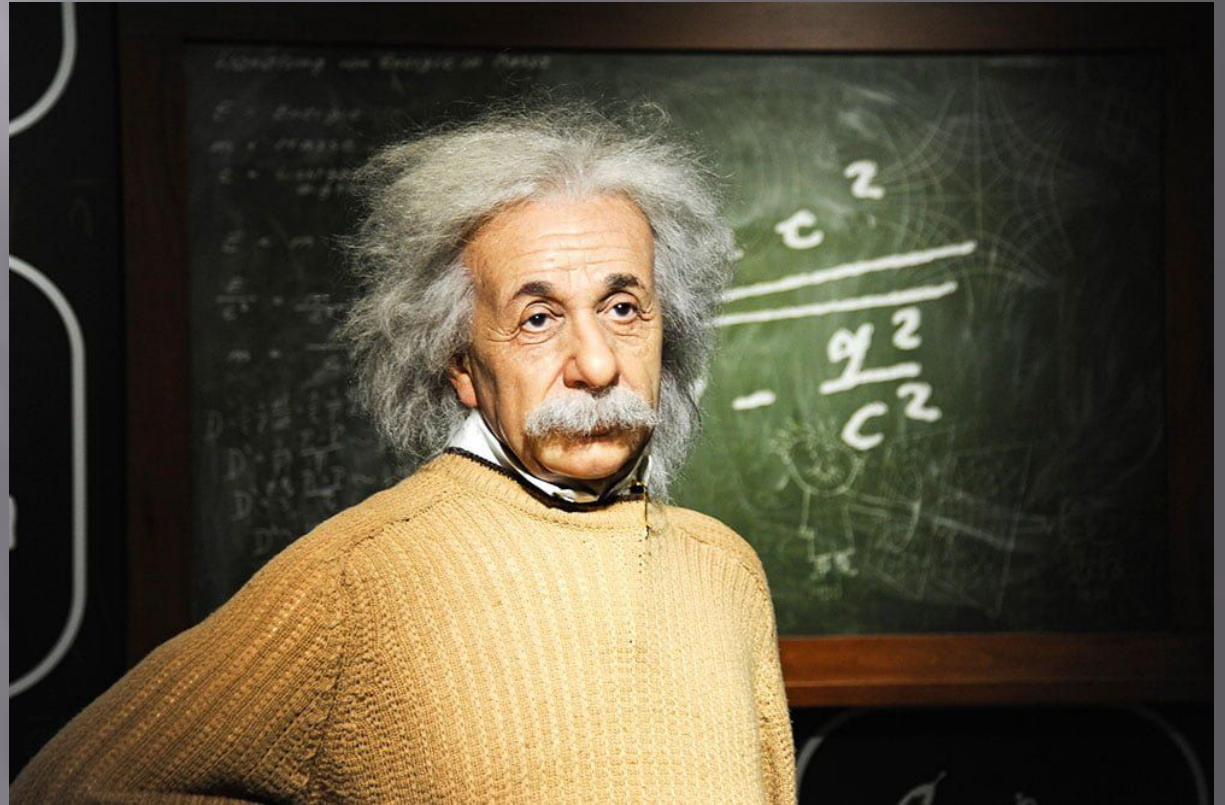

In 1905, at the age of 26, he published five major research papers in an important German physics journal.

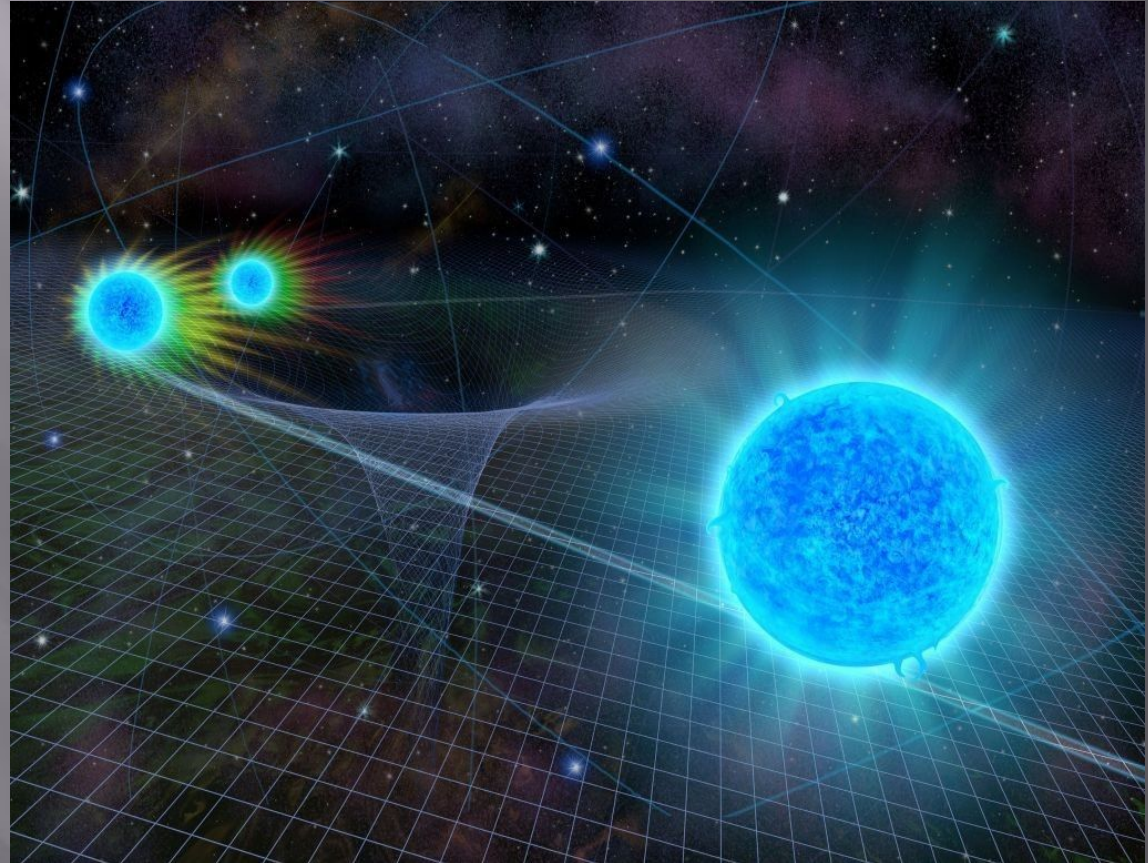

He received doctorate for the first paper.

His theories of relativity led to entirely new ways of thinking about time, space, matter, energy, and gravity.

In 1916, Einstein published his General theory of relativity. In 1919, this theory was confirmed.

Television and other inventions are practical applications of Einstein`s discoveries.

Einstein died in Princeton, on April 18, 1955.
