About the film :

- Avatar is a 2009 American science fiction film written and directed by James Cameron and starring Sam Worthington and Zoe Saldana. The film takes place in the year 2154, when humanity is mining the valuable mineral anobtanium on Pandora, an inhabited satellite of a gas planet in the Alpha Centauri star system. In the story, a resource-mining corporation threatens the existence of a local tribe of humanoid intelligent beings - the Na'vi.

Our emotions about this film :

- Mariam :I liked this movie because it is very interesting , unusual and informative . I watched this movie as a child . The characters in it seemed to me something unusual and I really liked them . So, this film carries with it a message – it doesn't matter what you look like, the main thing is what you are as a person

Avatar is not just a movie. This is something more that humanity has not yet seen. "Avatar" is a remarkable breakthrough Cameron is also well known for his projects such as: " Terminator 2: Judgment Day " and "Titanic". Avatar is the story of Jake Sully, a paralyzed Marine who replaces his twin brother on a secret mission to infiltrate Na'vi. this is a tribe that is located in Pandora. Pandora is a new virgin world, rich in minerals that people from earth need. When Jake gets there, he learns to understand the beautiful world of nature, the beautiful world of the Na'vi tribe. He falls in love with Na'vi, Neytiri. If you ask me: "What is an avatar for you?"I would answer: "An entertaining film that I have remembered all my life. "Avatar" is not just the best movie of the millennium. At the tribe On'Vi is a phase 'I see you.' And this is something special. If you look at "Avatar", you will understand, then.

Avatar... is in future filmmaking. The director and screenwriter of "Avatar" is the legendary James Cameron, who has returned bigger, more successful and mature in his crowning work of his career. James really a fantastic movie that everyone on Earth should see. Avatar is not just a movie. This is something more that humanity has not yet seen.
