# RUSSIAN OIL INDUSTRY

Oil companies in Russia are connected by a complex set of interactions, ensuring the path of oil from the drilling rig to the gas tank of your car. The giants of the oil industry solve dozens of the most important tasks, including through a developed system of subsidiaries and enterprises.

The oil industry of Russia is a strategic outpost of the country, the basis of stability and the basis for the development of a modern economy. The modern world cannot be imagined without oil refinery products: fuel for space rockets, road surfaces and medicines, a toy in the hands of a child - all these are products of the oil industry in Russia and in foreign countries.

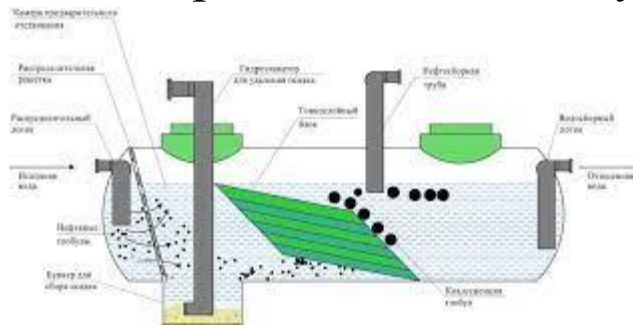

# OIL COMPANIES

Of course, their activities cannot do without the involvement of small oil companies specializing in after-sales service, construction of drilling and auxiliary facilities, well workover, pipeline laying and other specialized functions. With all the striving for universality, natural monopolies have certain specifics, given by natural and economic conditions.

Every oil company has a different field of activity, whether it's offshore development, refinery design, or oil transportation. Some of them spread their influence over the entire territory of Russia and partially foreign countries; other companies have a strictly regionalized resource base.

# GAZPROM NEFT OAO (OPEN JOINT STOCK COMPANY)

One of the largest oil and gas companies in Russia, whose main activities are oil and gas production, oil and gas field services, oil refining and marketing of petroleum products.

The company operates in the largest oil and gas regions of Russia: Khanty-Mansi Autonomous Okrug, YaNAO, Tomsk and Omsk regions, as well as in the Chukotka.

Autonomous Okrug. The main processing facilities of the company are located in the Omsk, Moscow and Yaroslavl regions. The network of sales enterprises of Gazprom Neft covers the whole country.
