

ВВЕДЕНИЕ -

- Life events are considered to be essential for people-
данное утверждение общего характера- в
**заклучении часто пишем о важности – там это
необходимо – в этом формате можно не
использовать этот ход**
- Nowadays there are many **things** which are happening
to humans – **things не даёт информации о теме-
читается как о событиях связано с любой темой-
life events всегда имели место в жизни человека**
- I am currently working on a project **on this issue** (какую
именно проблему для изучения подчёркивает автор
для своего проекта – **issues to life events**) , and I have
found a bar chart with some interesting data **about
people in Russia** (данные не о людях – а о life events)

REPORTING FACTS +/-

- The bar chart demonstrates the **popularity** of each life moments – в условии нет информации popular – есть important
- It is noticeable that having children is the most important type of event of all while getting a job is the least **popular** one (сравнение). Roughly 57 percent of respondents choose to have children whereas the proportion of people who prefer getting a job is 7.8 percent (факт)

MAKING COMPARISONS +/-

- **Apart from that**, it is obvious that getting married rank second (факт) . The number of people choosing this event is slightly lower than those who want to have children, representing 55.6 percent (сравнение) . Leaving home and getting a degree are less popular (essential) than getting married but still more frequently chosen than getting a job (43,2 and 33,5 percent respectively (сравнение) .
- Встречается apart from = as well as / except for

OUTLINE A PROBLEM +/-

- **In my opinion**, there is an evident problem connected with life events revealed by these statistics. It is quite clear that getting a job is not in (on) demand. One possible solution to that is higher (high) salaries and motivating ~~of~~ the **graduates** for further development and _____ can encourage people to get a job and grow professionally – по структуре это два отдельных предложения
- In my opinion – организация – это задача 5 параграфа
- Graduates – не ясно читающему почему именно graduates
- On demand – по-моему у него другой контекст

CONCLUSION+

- To conclude, I would like to say that any life event is a vital part of human life. It is not only essential but also **responsible**
- I would like to say - это фраза на самом деле не выражает мнение – тем более для письменной речи – не могу сказать кто и когда предложил её для сочинения рассуждения
- **Responsible – ответственность у человека**
