Dear Ronny,
Thanks for your email massage. It was great to hear from you!

In your email you asked me some questions/(In your email you asked me some questions about ...). To tell the truth, the weather in summer is usually fine in Russia. But in some regions of Russia the weather is changeable and unpredictable in summer. Actually, my favourite season is summer because I don't have to go to school. By the way, this summer I'm going to spend in the country with my family.

In your email you've written about your uncle. How old is he? Is he coming alone or with his family? How long is your uncle going to stay? How are you going to

Air pollution and climate change

- Overloading of the atmosphere and of ocean waters with carbon.

 Atmospheric CO₂ absorbs and re-emits infrared-wavelength radiation, leading to warmer air, soils, and ocean surface waters

 which is good because the planet would be frozen solid without this.

 Unfortunately, there's now too much carbon in the air. Burning of fossil fuels, deforestation for agriculture, and industrial activities have pushed up atmospheric CO₂ concentrations from 280 parts per million (ppm) 200 years ago, to about 400 ppm today. That's an unprecedented rise, in both size and speed. The result: climate
- Carbon overloading is only one form of air pollution caused burning coal, oil, gas and wood. The World Health Organization
- <u>recently has estimated</u> at one in nine deaths in 2012 were ESTIMATE attributable to diseases caused by carcinogens and other poisons in polluted air.
