

1 Light and Dark

In this module you will:

- find out about different light sources
- understand that darkness is when there is no light
- find out about shadows.

 The sailors are looking for people in the water. Why are they using a searchlight? 

Possible response: The sailors are using a searchlight to look for people in the water. It would be too dark if they didn't have a light.

Possible response: Fish that live deep in the ocean do not have eyes because there is no light.

Many animals have eyes. These let the animals see things.

 Some fish that live deep in the ocean do not have eyes. Why? 

Word Cloud

light
look dark
guess (predict)
torch Sun
prove

Amazing fact

Light travels at 300 000 000 metres every second. That is very fast!
