ice with a stick.

ice hockey

10

Divide the class into two or more teams and allow one team to answer the first question. If they answer the question correctly within the time limit (10 seconds), the team receives the total amount of points for that question. If they do not answer the question correctly, the other team gets the opportunity to answer it. Play until there are no more questions. The team with the most points at the end wins the game.
