sickly/spell/

Magic School

It has always been a dream.

Alchemists were looking for global solutions, something that can change things at once. From ancient scientist to Covid 19 vaccines.

Alchemy classes are not mentioned in the *Harry Potter* series; however, Rowling has used Alchemy as an example of a 'specialized' subject offered when there is sufficient demand. Alchemy is a philosophical tradition searching for the philosopher's stone, which is said to have the power to turn base metals into gold and to contain the elixir of life, which makes or keeps the drinker young and immortal. As mentioned in *Harry Potter and the Philosopher's Stone*, Nicholas Flamel created a Philosopher's Stone, but it was destroyed at the end of Harry's first year.

List of Potions

AGING POTION

A potion that, depending on the amount taken, ages the drinker to various ages.

- *"Age yourself temporarily with this powerful potion."* — Description

Forgetfulness Potion

We've all had awkward encounters we would love to forget at some stage in our lives, and thankfully, there's a potion for that. But with Memory Charms usually doing the job, is this potion really necessary? Perhaps if you don't have a wand to hand and need someone to forget something on the sly...

Confusing Concoction

This potion isn't one we'd brew personally – there are enough confusing things in the world as it is. But we see the appeal for mischief makers.

Babbling Beverage

We all get a bit tongue-tied now and then. A quick swig of Babbling Beverage and you'll be chatting away for hours. Problem solved. Until the babbling itself becomes a new problem.

Hiccoughing Potion

Ah the Hiccoughing Potion – ever so useful if the hiccups are getting you down, but really, that's it. But we imagine it's a good early potion to teach to Hogwarts students learning the ropes.

Wolfsbane Potion

Amortentia is the strongest love potion in existence, causing the person who consumes it to develop a powerful infatuation for the person who administers it. Even though it fails to create true love, it will temporarily make someone's crush fall head over heels *in lust* with them.

It's important to note that the love potion does carry a risk of going awry though. Romilda Vane finds this out the hard way after she spikes a box of Chocolate Cauldrons meant for Harry, but they somehow end up with Ron, who becomes besotted with Romilda, much to her disappointment.

What can we say? It was obviously love at first bite.

What sort of a packaging or container
your potion **needs?**

BAR
CARTON
BOTTLE
PILL
TABLET

IS it LIQUID/ SOLID / AEROSOL?
