

The effect of drugs on the human body

**A person is a unique being
with a very complex
organism**

**Is very dangerous to
prescribe drugs yourself**

Proper use of medicines:

- ✓ **treatment by the drug should be prescribed only by a specialist doctor in accordance with the patient's disease;**
- ✓ **Do not self-medicate;**
- ✓ **take the drug strictly according to the instructions and according to the age of the patient;**
- ✓ **when taking certain medicines, you should not eat certain foods, while taking other medicines, you must increase the amount of drinking;**
- ✓ **Do not use the medication after the expiry date;**
- ✓ **Keep medicines out of the reach of children**

**It is very important to remember
that self-medication is harmful.**

An illustration showing a doctor in a white coat and blue shirt examining a patient's arm. The doctor is using a black blood pressure cuff on the patient's arm. The background is a collage of colorful geometric shapes in shades of green, yellow, and orange. The text is overlaid in a bold, blue, sans-serif font.

Medications help to eliminate the disease. But it is very important to remember that for a person there is nothing better and more valuable than what is in nature.
