

Me and my hobbies

Prepared by a first year student Shchepetilnikov A. Y.

Introduction:

I am an 18 year old student of Kuban State University, grew up and live in Krasnodar and in this short presentation I would like to talk about my interests and hobbies.

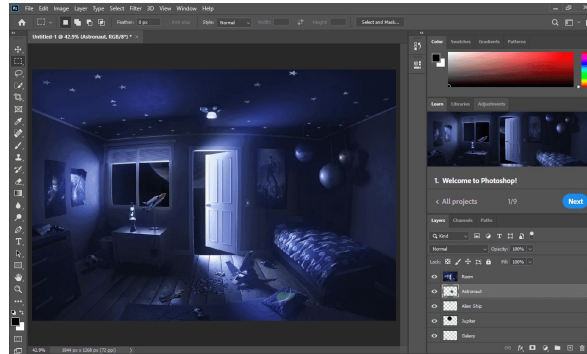

Drones:

Over the past few years, I have been actively engaged in the assembly and programming of drones, as well as flying them. In addition, I had my own technical project, which, unfortunately, could not be implemented due to the pandemic.

Photo and video editing:

Another equally important hobby in my life is photo and video editing. The process of creating something new is similar to drawing - it calms and relaxes!

Thanks for your attention!
