

Scientists have made an alarming discovery about what kinds of pollution are most harmful to seabirds. A study led by Australia's Institute for Marine and Antarctic Studies discovered that balloons were the deadliest kind of plastic for seabirds. Balloons are 32 times more likely to kill seabirds than hard plastics. While balloons and other soft plastics accounted for only 5 per cent of plastics ingested, they were responsible for more than 40 per cent of deaths among seabirds. Hard plastic fragments may pass quickly through the gut, but soft plastics are more likely to become compacted and cause fatal obstructions. Plastic is becoming an increasing threat to seabirds. With an estimated 280,000 tons of floating marine debris worldwide, about half of all seabird species are thought to ingest plastic on a daily basis. Birds are especially likely to swallow dangerous balloons because they closely resemble squid, according to the stu

You are considering to order sushi and now you'd like to get more information. In 1.5 minutes you are to ask five direct questions to find out about the following:

- where and when the photo was taken
- what/who is in the photo
- what is happening
- why you keep the photo in your album
- why you decided to show the picture to your friend
