

YouTube is a free **video sharing website** that makes it easy to watch online videos. You can even create and upload your own videos to share with others.

Originally created in **2005**, YouTube is now one of the most popular sites on the Web, with visitors watching around **6 billion hours** of video every month.

The name "YouTube" is actually pretty straightforward. The "You" represents that the content is user-generated, created by individual users and not the site itself, and "Tube" is an older original term for television.

Action-adventure games From Resident Evil 8

YouTube was originally created as a platform for anyone to post any video content they desired. It was hoped that users could use the site to upload, share, and view content without restriction.

According to its founders, *Chad Hurley, Steve Chen, and Jawed Karim*, the idea was born at a dinner party in San Fransisco, about a year earlier, in 2004. The trio was frustrated by how hard it was, at the time, to find and share video clips online.

PROS:

- it is easy to use in everyday life: YouTube is available either on PC or mobile phone;
- there are no analogs for YouTube;
- the system of recommended video is provided;
- so many people from around the world are gathered together on YouTube;
- delayed video publishing mode.

CONS:

- not all YouTube videos are appropriate for **everyone**, especially children under the age of 13;
- sometimes the system of recommended video does not work in a proper way;
- in most cases the information given by bloggers here is not verified;
- YouTube could bring harm while learning new language.
