

Scientists have breathtaking news that there is water on the Moon. The Moon may hold water in more places and in larger amounts than they thought. The scientists analyzed two studies in detail and confirmed the presence of water molecules on the side of the Moon we can see. Ice was thought to exist on the dark side of the Moon, which is blocked from sunlight. NASA said it found water on the sunlit parts of the Moon. It says it found a third of a litre of water in one area. This was not enough to form ice as the molecules were trapped in rock. This discovery could be a game-changer in paving the way to explore space. We could build permanent moon bases because there could be a sustainable source of drinking water. This could make rocket fuel one day. NASA said: "Water is extremely critical for deep space exploration. It's a resource of direct value for our astronauts. Any time we don't need to pack water for our trip, we have an opportunity to take other useful items with us." Astronauts could take heavier materials to do bigger scientific experiments.

01:30

No Good Deed Goes Unrewarded!

1. location
2. online interview
3. venue of the training session
4. minimum / maximum number of visits a week
5. duration of the visit

You are considering becoming a volunteer at the Nursing home and now you'd like to get more information. In 1.5 minutes you are to ask five direct questions to find out about the following:

01:30

00:20

- where and when the photo was taken
- what/who is in the photo
- what is happening
- why you keep the photo in your album
- why you decided to show the picture to your friend

01:30

- where and when the photo was taken
- what/who is in the photo
- what is happening
- why you keep the photo in your album
- why you decided to show the picture to your friend

02:00

- where and when the photo was taken
- what/who is in the photo
- what is happening
- why you keep the photo in your album
- why you decided to show the picture to your friend

01:30

- what is happening
- why you keep the photo in your album
- why you decided to show the picture to your friend

01:30

- give a brief description of the photos (action, location)
- say what the pictures have in common
- say in what way the pictures are different
- say what lifestyle presented in the pictures you prefer
- explain why

02:00
