Problem of technological innovation in Upper Paleolithic

The longest interval of technological creativity in history

Material culture of Kostenki 11

Conclusion

- The results of the study “bone collection of the Kostenki 11 site” showed a high level of development of society and the expression of the spiritual culture of the ancient human beings
- rapid pace of innovation and the complexity of artifact design are unprecedented
- traces of mechanical technology appear in the archeological record for the first time

Thank you for your attention
