

8 KEYS TO SUCCESS

By Maria Timoshenko 8a

~ Socialization ~

- Everyone should have friends. We are members of our society, and the most important thing in it is socialization. If a person has good communication skills, they have a lot of friends and a successful job. If you get along with people, you can succeed in life. You can hold difficult negotiations and help people save the world.

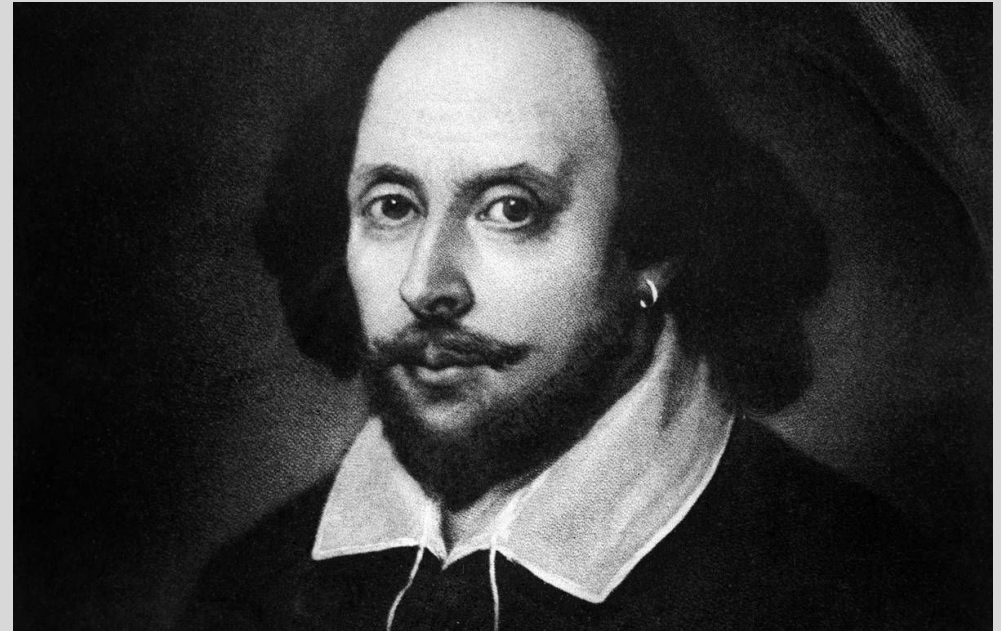

~ Food and purchases ~

- My favorite food is steak. This is a very delicious beef dish that I often eat in a restaurant or at home. Steak is not the most useful, but not the most harmful dish. Sometimes it is fried in oil, which makes it less useful. Most often, cooks prefer to over-salt the meat, which is also not very good. But there are also advantages to the steak. Meat is incredibly healthy and delicious, contains a lot of protein, which is important for the human body. That's why I love this food.

~ Great people ~

- I want to tell you about a famous, successful and great man - William Shakespeare - an English poet. He was born in 1564 and at the age of 26 created his first play - the Chronicles of "Henry VI". Some of the most popular tragedies are "Romeo and Juliet", "Hamlet" and "King Lear". I often reread these works and always remain delighted after reading them. If you are not yet familiar with this beautiful poet, then it is time to correct this misunderstanding.

~ Personality ~

- The character depends on different factors. Firstly, the main factor is family and relatives. The family relationships affect to the character in the same way as friends. If a person grows up to be kind, friendly and be sociable, then you will have a good life. As for me, I have an amazing family. It supports me and always helps me if it is necessary. I don't have many friends, but they are incredibly important to me and play a key role in my life. I think these factors are necessary for a complete personality. I'm a happy person.

~ Global problems ~

- The global problem is the coronavirus. This is a dangerous infection for all people in the world. We must follow the rules to save us and their families. Recklessness leads to the sad consequences. We must help each other and believe that by adhering to certain attitudes, we can overcome this disease.

~ My dream ~

- All my life I have dreamed of going to Malta , a small island country in the Mediterranean sea. I would like to learn and practice English, and there are many good language schools in Malta. I think it will be a good experience for me, because I will probably be able to make a lot of good friends during this trip and be successful at English language. I dream of swimming in the sea surrounding this island.

~ Education ~

- Nowadays the distance education is actual problem. Should all teaching and learning take place online these days? Distance learning has both advantages and disadvantages, but my personal opinion is as follows. During distance learning, it is very difficult for me to organize myself, so I put most things on hold for the last moment. I don't see my friends and teachers, which is also very frustrating. In the future, perhaps, distance learning will be relevant, but I believe that it should echo the usual.

~ My hobby ~

- My favorite hobby is writing poetry and literary letters. I do this in my free time almost every day and I am happy with my progress in this direction. My parents support my interest and desire to continue. This develops my imagination and gives me good practice in spelling and punctuation. I love what I do. I will probably move on and be more successful.
